

The following is only an abstract of one of our earlier reports. An email request for a printed or PDF copy of the complete report can be generated by clicking on the **Report Number** of this report in the table of reports on the [Research Studies and Reports](#) page. The PDF copy of the complete report was created by scanning an original, printed copy, and thus is only *partially* searchable and *is not* accessible, but is fully printable.

A printed or PDF copy of our studies and reports may also be requested by mail or phone at:

Department of Motor Vehicles
Research and Development Branch
2570 24th Street, MS H-126
Sacramento, CA 95818-2606
(916) 657-5805

For a request by mail, please include the report number and your name, address, and phone number. Also, please state whether you are requesting a printed copy, a PDF copy, or both. For a PDF copy, please include your email address.

TITLE: Development of a California DUI Management Information System

DATE: September 1989

AUTHOR(S): Clifford J. Helander

REPORT NUMBER: 121

NTIS NUMBER: PB90-196825

FUNDING SOURCE: Office of Traffic Safety and National Highway Traffic Safety Administration
(NHTSA)

PROJECT OBJECTIVE:

To develop the design specifications for a comprehensive California Dill management information system.

SUMMARY:

In cooperation with an advisory committee of representatives from all components of the DUI Control System, the conceptual design specifications for a comprehensive California DUI Management Information System (DUI-MIS) were developed. DUI-MIS system and subsystem goals and objectives were identified, and measures of system performance, detailed specifications, and report formats were developed and are described here. The report notes that the management information system is designed to provide "state of the system" feedback to the Legislature, law enforcement, prosecutors, the courts, and other DUI system operatives. The advisory committee also developed general recommendations for DUI system improvements, which are listed in the report.

IMPLEMENTATION STATUS OF FINDINGS AND RECOMMENDATIONS:

The establishment of the type of DUI-MIS developed by the project was legislatively mandated by AB 757 (Friedman), effective 1/1/90.

SUPPLEMENTARY INFORMATION:

The first annual report of the California DUI Management Information System was published in January 1992. That report, and the series of reports published each year thereafter, have received widespread acclaim and acceptance, and the DUI-MIS has served as a model in NHTSA's development of a national model DUI data reporting system.
